

# Stone Lake Stormwater Outfall

## Fact Sheet

**August 2019**

### Project Goals

1. Reduce flooding on Sandra Lee Avenue
2. Further separate storm infiltration from the sanitary sewer system.
3. Minimalize storm and sanitary sewer back ups for the community overall.

### Project Description

As part of the project the contractor, Bunn Excavating Inc., will install approximately 2550 linear feet of storm sewer in easements from Mayflower Road to Stone Lake then to the St. Marys River. This storm outfall is more than twice the size of the previous one. New piping will range from 12" in diameter to 24" in diameter. The Stone Lake Stormwater Outfall will include the installation of storm drain inlets, fresh man holes, and a new street to complete the project.

### Project Time Line

July 2019 – Construction bids received by Board of Public Works  
August 2019 – Construction begins  
Spring 2020– Construction complete

### Estimated Project Cost

Design and construction            \$930,000

### Project Manager

Construction Manager – Nick Rupley
