

CITY OF FORT WAYNE CITY UTILITIES

Auburn Road / Talisman Drive Septic Elimination Project Overview

City Utilities is working to eliminate failing septic systems in the city, by making connections to the public sanitary sewer system available for these properties.

The Problem

Septic systems have a limited life and eventually fail. In addition, the soil types in Allen County are poor for septic waste absorption. As a result, human waste leaches into groundwater, backyards and neighborhood ditches and streams. Failing septic systems are linked to unsafe levels of *E. coli* in many neighborhood streams and ditches.

The Solution

To address health hazards in our neighborhoods, the Septic Elimination Program (SEP) was implemented to convert many neighborhoods on septic systems to public sanitary sewer service. Neighborhoods with higher septic system failure rates are the priority of our program.

This project will bring sewers to approximately 5 homes by February 2013. This will address approximately 1% of the 500 homes still on septic systems in Fort Wayne.

Approximately 5 properties are part of the Auburn Road - Talisman Drive project. This project will include the installation of 968 LF of 8" PVC sewer main to service homes currently on septic tanks along Auburn Road and Talisman Drive.

Project Status

Project Status: Connection to Sewer

Construction Period: Completed

Estimated Project Costs: \$77,570

Approximate # of Properties in the Project: 5

Cost per Property: \$15,514

Project Benefits:

- Improved quality of life; worry free use of home facilities
- Reduced maintenance worries
- Improved environmental and health conditions for homes and neighborhoods
- Greater protection for well water, streams and drainage ditches
- Homes possibly become more marketable
