

CITY OF FORT WAYNE

THOMAS C. HENRY, MAYOR

City Utilities Engineering

March 8, 2019

Dear Brookside Estates Addition Resident and/or Property Owner:

Fort Wayne City Utilities is developing a design for a project that will help provide better drainage in portions of your neighborhood. The design will include the installation of new storm sewers, replacement of other stormwater management infrastructure that is undersized, and regrading areas to direct more stormwater to the storm sewers. We would like to meet with you to show you the plans, answer your questions, and gather more information about any concerns you may have.

We hope you will be able to join us for a neighborhood meeting:

Thursday, March 28, 2019 at 6:00 PM
Riverlodge in Shoaff Park
6401 St. Joe Road
Fort Wayne, Indiana

The meeting will include a short presentation followed by the opportunity for you to look at the project plans and discuss them with members of the City Utilities engineering staff.

The Riverlodge facility is accessible for persons with disabilities. However, if you need other accommodation such as a language or sign language interpreter, please contact the design manager Landon Geiger at the phone number or email address shown below, at least 48-hours prior to the meeting.

If you have questions between now and the meeting, or if you cannot attend the meeting but would like to discuss the project, please feel free to contact Landon Geiger by calling 260-427-8586 or by email at Landon.Geiger@cityoffortwayne.org.

City Utilities looks forward to working with you as we begin this important project.

Sincerely,

Anne Marie Smrcek, P.E.
Manager of Wet Weather and Stormwater Engineering
