

# Wald Road Water Main Extension

## Project Fact Sheet

January 2019

### Project Goals

1. Provide increased water pressure and water availability for new construction along the US 30 corridor West of Kroemer Road.

### Project Description

The installation of approximately 1,350 feet of 16" HDPE piping along with fire hydrants at each road intersection. This new water line will be installed on the north side of Wald Road and will be horizontally directionally drilled to minimize disruption to the home owners and local traffic.

### Project Time Line

January 21, 2019 – Water main construction begins  
March 2019 – Water main construction complete  
May 2019 - Grass seeding and ground restoration completed

### Contractor

Precise Boring of Ohio.

### Construction Manager
