City Utilities is working to eliminate failing septic systems in the city, by making connections to the public sanitary sewer system available for these properties.

The Problem
Septic systems have a limited life and eventually fail. In addition, the soil types in Allen County are poor for septic waste absorption. As a result, human waste leaches into groundwater, backyards and neighborhood ditches and streams. Failing septic systems are linked to unsafe levels of *E. coli* in many neighborhood streams and ditches.

The Solution
To address health hazards in our neighborhoods, the Septic Elimination Program (SEP) was implemented to convert many neighborhoods on septic systems to public sanitary sewer service. Neighborhoods with higher septic system failure rates are the priority of our program.

Approximately 7 properties are part of the 6200-7000 Hosler Road project. This project will include approximately 2,005 lineal feet of 2-inch pipe, 2 air release valve manholes and 1 cleanout terminal to serve 7 properties with septic systems.

---

**Project Status**

- **Project Status:** Completed
- **Construction Period:** Completed
- **Estimated Project Costs:** $55,667
- **Approximate # of Properties in the Project:** 7
- **Cost per Property:** $7,952

**Project Benefits:**

- Improved quality of life; worry free use of home facilities
- Reduced maintenance worries
- Improved environmental and health conditions for homes and neighborhoods
- Greater protection for well water, streams and drainage ditches
- Homes possibly become more marketable

**SEP Information:** 260-427-5064

**Department of Health:** 260-449-7561
