## TRAFFIC ENGINEERING

## Mission Statement

The mission of the Traffic Engineering Department is responsibility for all aspects of roadway traffic engineering and operations/maintenance including implementation of programs related thereto. General areas of responsibility include: traffic signals, installation and maintenance of fiber optics, WiFi, electrical maintenance, traffic signs, pavement markings, street signs, bus route signs, truck route signs, impact attenuators, traffic design/review, transportation planning, accident analysis, traffic level-of-service analysis and liaison with other agencies.

## Goals and Objectives

The Traffic Engineering Department endeavors to provide safe and efficient movement of vehicles, people and goods through the community as advocated by the established regulations and the elected administration. Goals and objectives can be categorized into the following areas:

- 1) The department strives to produce and make available the maximum level of service for traffic with the limited resources available for capital improvements and operation.
- The department attempts to develop new engineering techniques for moving persons and goods safely and efficiently.
- 3) The department continues to create and maintain a communication channel between the administration and the public. This is to align department services in accordance with administrative policy making, as well as provide the timely interchange of incoming and outgoing information with the public.

<sup>\*</sup> Although capital improvements, actual expenditures will be made from the 5200 budget series.

The Traffic Engineering / Traffic Operations Department is responsible for all aspects of roadway Traffic Engineering operations and maintenance.

Areas of responsibility include: the design, installation, timing and maintenance of traffic signals, pavement markings, sign installation, maintenance, traffic design and review, transportation planning, traffic calming devices, accident record compiling and analysis. Signal service personnel are on duty 24 hours a day, seven days a week. Sign personnel respond to knockdowns of stop and yield signs and are on an call basis during non-working hours.

Revenue for departmental funding comes from Local Roads and Streets (LRS), contracts with INDOT, Allen County, New Haven, and claims reimbursements, as well as subsidy from the property tax. Improvements to high volume traffic routes such as signalization, intersection interconnects, signal modernization's, separate turn lanes, and additional "thru" lanes have depended upon CEDIT, federal and private sources for funding.

- 1 & 2 Vehicles and equipment are replaced on a rotating basis based on 1) maintenance costs 2) mileage 3) age.
  - 3 Actra fiber optic conversion. This item will include replacing electronic equipment to utilize fiber optic cable for interconnection of traffic signals.
- 4 Traffic Signal Modernization This program updates a signalized intersection to aluminum mast arm poles, 12" traffic signal indications and new wiring. Intersections with steel poles and 8" signal indications that were last modernized in the 60's are currently being done. This program is updated annually to coordinate with transportation projects.
- 5 Traffic Signal Controller Replacement This program replaces obsolete and discontinued traffic signal control units that have been in service for at least ten years.
- Traffic Signal Head Replacement-This program replaces traffic signal indications which were installed in the 70's The program is designed as a preventative maintenance and safety program.
- 7 In 2000 and 2001 our Eagle Comtract Traffic Signal Control System was replaced with an Eagle Actra Advanced Traffic Management System. The new system allows expansion of our computerized traffic signal network.
- 8 Office equipment replacement: printers, scanners, etc.
