MLK BRIDGE

MLK BRIDGE—LIGHTING PROGRAMS

The MLK Bridge standard program is Blue and Yellow, which are the city colors. The standard weekend program runs a variety of color options and designs.

The City of Fort Wayne Division of Public Works Traffic Engineering Department manages lighting programs for the MLK Bridge over the St. Mary's River on Clinton Street.

Requests for changing the lighting programs are to be submitted to Traffic Engineering for review and coordination with other pre-programmed or previously requested events. Nationally observed holidays are pre-programmed annually and will not be altered.

Individual requests may be permitted on a limited basis for special circumstances. Groups that may request to change the MLK Bridge are national non-profits with local affiliations, local education facilities, local sports teams, area community partners or groups with community significance.

Requests should include the following:

- Group Name
- Group Contact Name and Phone Number
- Dates Requested
- Colors Requested

The Bridge will light up the night of your request starting 30 minutes before sundown and run until 30 minutes after sunrise the following day. Programs are generally limited to 2-3 days.

Requests go to: Traffic@cityoffortwayne.org
